Bald Spot Sports Specified Supplier of the 2006 Swift Formula Atlantic Race Car for the Yokohama Presents the Champ Car Atlantic Championship Powered by Mazda

For Immediate Release

Indianapolis, IN – April 8, 2006 -- Bald Spot Sports [BSS] has been named the specified supplier of energy absorbing headrests for the 2006 Swift Formula Atlantic race cars by Swift Engineering. The Creasorb™ headrests will be custom-engineered to meet the design specifications of the 2006 Swift 016.a Formula Atlantic race cars and fabricated using a patented CNC machine process which carves the headrests from foam blocks without a plastic shell.

Glen Macdonald, co-founder of BSS said, "We are excited to lend our advanced technology to a job at this scale affiliated with a national series like the Yokohama Presents the Champ Car Atlantic Championship Powered by Mazda. Old technology required each headrest to have a plastic shell into which the loose beads would be molded. BSS is the logical vendor of choice because of the quality and standardization our patented custom product brings to the racing industry."

The removable headrests will be attached to the race car after the driver enters the cockpit to provide head, neck and spine stability for the driver during an impact, absorb energy forces acting on the driver, and minimize the driver's chance to experience injury.

The BSS exclusive Creasorb™ foam supplied by Createc Corporation is a superior multi-impact foam which continues to absorb energy forces after the first impact and offers greater elasticity while holding its shape. Multi-impact foam combined with the patented process licensed from Alan Lewis, president and CEO of Createc Corporation, allows for exact reproductions every time, thus saving the customer both time and money.

The Creasorb™ foam headrests are also lighter due to the absence of resin in the manufacturing process, making them constant in composition without voids or hard spots. Fused bead needed for CNC applications also requires less carbon fiber to hold the headrest together.

The headrests will be in use from April to October over a 12 event race series occurring across the United States and in Canada and Mexico. Individual Champ Car Atlantic Championship teams have the opportunity to purchase Creasorb™ race seats from BSS.
